**To whom it concerns:**

Newlook Contracting was the low bidder for the Sanford Middle School project, including building demolition, earthwork, and utilities. The building demo included removing 3 older portions of an existing very outdated building, all constructed at different periods of time. The work started when school was still in session, and required close attention to the delicate building separations and removal.

NewLook's operators were conscientious, careful, and very safety conscience. Wyatt was very familiar with the means and methods of how to remove the 3 story building, without disrupting the faculty and students. His projection of time required for building demolition was spot on.

Newlook has an excellent safety program and adhered to Westin's safety policy. The operators were kind, courteous, cooperative and very helpful in reviewing the plans and details with our superintendent.

I appreciated the forward thinking of Newlook on the Sanford project and would recommend them, especially for complex, intricate, and delicate projects.

Regards,
